**NEW-INDY RELEASES ANIMATION HIGHLIGHTING REMEDIATION EFFORTS**

New-Indy Catawba released an animation video highlighting many of the mill’s recent remediation efforts. The animation illustrates improvements to the Aeration Stabilization Basin, the Equalization Basin, Sludge Pond 4, and the Post Aeration Basin.

Most recently, New-Indy Catawba completed construction on a massive containment system that captures and refines excess and used chemicals and recycles them back into the system rather than allowing them to become waste.

**New-Indy’s new animation video highlights remediation efforts & improvements since it purchased the mill in 2019:** Scan the QR Code to visit New-Indy Catawba’s YouTube channel and learn about the mill’s remediation efforts.

**COMMUNITY NEWS**

**NEW-INDY CATAWBA COMPLETES ANOTHER SUCCESSFUL PALMETTO BOWL DONATION DRIVE**

Last month, New-Indy Catawba completed its annual Palmetto Bowl Food Drive. Named after the South Carolina rivalry between the University of South Carolina and Clemson University, the event asks employees to donate food in honor of their favorite college football team. The team with the most items donated wins. New-Indy Catawba then flies the flag of the winning team and mill manager Chris Loach wears the winning team’s jersey. All the food collected was donated to a local food bank. This year a total of 963 items went to the Fort Lawn Community Center in honor of South Carolina.

## NEW-INDY INTERNSHIP PROGRAM OFFERS HANDS-ON EXPERIENCE

One important but little-known program New-Indy Catawba offers is its high school student internship program. The mill hosts interns each semester from regional high schools and offers them meaningful, practical training. One recent intern group completed a welding class. Brothers Shaun and Mitch Williams, owners of Williams Fabrication, hosted interns for a free, half-day welding class that taught them what good welds look like. This is one example of the many opportunities and benefits New-Indy Catawba provides the local community. For more information about the internship program, please call New-Indy at 803.670.2001.

## ABOUT NEW-INDY CATAWBA

New-Indy Catawba is a world-class integrated virgin linerboard and pulp manufacturing mill located on the Catawba River. The facility opened in 1959 and began operation as New-Indy Catawba in 2019. The mill produces a lightweight linerboard used in corrugated packaging and unbleached pulp for other applications.

The facility supports the livelihoods of more than 400 hard-working men and women and their families as well as hundreds of indirect regional jobs in logging, chemical and material supply, and transportation. In addition, New-Indy Catawba has partnered with the U.S. Department of Labor and York Technical College to develop an accredited apprenticeship program.

**Hot Stuff:** A local high school student learns how to weld during New-Indy's internship program.

**New-Indy Catawba:** The mill supports the livelihoods of more than 400 men and women and their families.

Thank you for reading the New-Indy Catawba newsletter. It provides the community with updates and developments at the mill. Additional information and daily updates can be found at [www.newindycatawba.com](http://www.newindycatawba.com).
